

Kylie Werren

I am nominating for the position of Director because I'd really like the opportunity to contribute to the continued success of the AAA organisation and our industry.

I believe I would bring a practical and sensible approach to the role. Through my business experience, I understand the importance of keeping a close eye on finances, planning, asking the right questions and making sure decisions are made with a clear understanding of the financial impact.

It's about making sure AAA is in a strong financial position so it can continue to support its members, invest in the right areas and make the most of future opportunities. I think it's important that members can feel confident that the organisation's finances are being managed responsibly and that their interests are always kept in mind.

I enjoy being part of a team and believe good decisions come from open, honest conversations and people working together towards the same goal.

I also see the role as a great opportunity for me to continue to learn. I'd like to gain a greater understanding of the Board, governance and the bigger-picture decisions that shape the future of AAA and our industry.

If elected as Director, I would bring commitment, common sense, attention to detail and a genuine desire to do a good job for AAA and its members. I'd be very proud to have the opportunity to contribute.
