

Paul Maslen

I have now been breeding alpacas for over 10 yrs which includes showing and also fleece sales for the co-operative to send overseas.

I have also been the finance officer with the AAA which was for the duration of approximately 4 years and therefore have extensive knowledge on the broader view of the members.

I am passionate about the future of the alpaca industry including the stability of financial positioning to be able to assist with the AAA receiving further government grants to support further research and development.
